

Daniel Madrid

Web Designer & Developer · UI/UX · Madrid, Spain

Creative developer specializing in elegant interfaces and user experiences

ABOUT ME

Web designer and developer with a strong focus on creating beautiful, functional user interfaces and seamless user experiences. I blend creative design thinking with modern web technologies to build responsive, engaging applications. Complementary expertise in systems programming provides deep understanding of optimization and performance.

EDUCATION

Epitech

2025 — Present

2nd Year · Digital Innovation & Programming

Intensive project-based learning with no traditional classes: self-directed study guided by weekly technical challenges and collaborative teamwork.

Lycée Français de Madrid

2012 — 2025

French Baccalaureate · Bilingual Education

13 years of rigorous education in a multicultural and multilingual environment. Strong foundation in sciences, humanities and critical thinking with a dual cultural perspective.

FEATURED PROJECTS

01 PocketVault <https://github.com/daniel-madrid-07>

Modern cloud storage application with elegant interface design. Features intuitive file management, custom categories, secure authentication, and a polished user experience with thoughtful interactions.

React

Firebase

UI Design

Auth
